

Psychologists Providing Technical Assistance

5/16/11

This document came out of a request from a Key Communicator to develop a set of technical experts at LADSE that districts can tap for technical assistance. When you are seeking support, we ask that you start with the school psychologist assigned to your district. The list provided certainly isn't exhaustive and many of the psychologists have overlapping areas of expertise. If you would like to access support from a psychologist assigned to another district, please contact Sue Gallagher-sgallagher@ladse.org; 708-482-1187.
